1. System Overview & Architecture

1.1 Technology Stack

Component	Details
Framework	Frappe v15
ERP Core	ERPNext v15
HR Module	HRMS (Frappe)
GST Compliance	india_compliance (Resilient Tech / Adaequare GSP)
Database	MariaDB (MySQL compatible)
WhatsApp	OpenWA (local gateway, port 2785)
AI Agents	Claude claude-haiku-4-5-20251001 via Anthropic API
Workflow Automation	n8n v2.26.9 (port 5678, PM2-managed)
Site Name	frontend

1.2 Company & Locations

Location	Code	GSTIN	Warehouse	Cost Centre
Maharashtra (Mumbai)	BWD	27AAECI3431Q1Z8	MAHARASHTRA - IB	Maharashtra - IB
Gujarat	SGM	24AAECI3431Q1ZE	GUJARAT - IB	Gujarat - IB
Chennai	CN	33AAECI3431Q1ZF	CHENNAI - IB	Chennai - IB

1.3 Document Naming Convention

DocType	Pattern	Example
Quotation	IB-{LOC}-Q-#####	IB-BWD-Q-00001
Sales Order	IB-{LOC}-SO-#####	IB-BWD-SO-00001
Delivery Note	IB-{LOC}-DC-#####	IB-BWD-DC-00001
Sales Invoice	IB-{LOC}-INV-#####	IB-BWD-INV-00001
Credit Note (SI Return)	IB-{LOC}-CN-#####	IB-BWD-CN-00001
Purchase Order	IB-{LOC}-PO-#####	IB-BWD-PO-00001
Purchase Receipt (GRN)	IB-{LOC}-GRN-#####	IB-BWD-GRN-00001
Purchase Invoice (Debit Note)	IB-{LOC}-DN-#####	IB-BWD-DN-00001

DN (Delivery Note) and SI (Sales Invoice) share a global sequential counter via MySQL advisory lock, so their numbers never overlap across locations.

2. Sales Workflow: Q → SO → DN → SI

2.1 Overview

Lead / Customer → Quotation (Q) → Sales Order (SO) → Delivery Note (DN) → Sales Invoice (SI) → Payment Entry (PE)

2.2 Creating a Quotation

- 1 Go to **Workspace → Sales & CRM → Quotation** or press Alt+Q.
- 2 Select **Quotation To:** choose *Customer* (existing) or *Lead* (prospect).
- 3 Set **Location:** Maharashtra / Gujarat / Chennai. This auto-sets the company address, GSTIN, and document naming prefix.
- 4 Add items. For each item row:
 - 5 Enter **Item Code** (multi-token search available).
 - 6 Enter dimensions: **Width (mm), Length (mtr), Qty/Pkg, Total Pkg**.
 - 7 Qty is **auto-calculated**: for SQMT items: $(width_mm / 1000) \times length_mtr \times qty_pkg \times total_pkg$; for others: $qty_pkg \times total_pkg$.
 - 8 Enter **Rate**. Amount is auto-calculated.
- 9 The system automatically selects the GST template (In-state / Out-state) based on customer GSTIN vs company GSTIN.
- 10 Floor Price check: if rate is below cost + minimum margin, Sales User is blocked; Sales Manager sees a warning.
- 11 Save (Draft) then Submit.

Quotations have a **valid_till** date (auto-set to 1 month). A daily scheduler sends expiry warnings at 15, 7, and 1 day before expiry. Expired quotations are auto-closed.

2.3 Converting Quotation to Sales Order

- 1 Open a submitted Quotation.
- 2 Click **Make → Sales Order** (the custom mapper fires, carrying all dimensions, transport, address fields).
- 3 Review the SO. Optionally add a **Cancellation Reason** field (required to cancel later).
- 4 Submit the SO. Stock is reserved at this point.

SO submit is blocked if: (a) customer outstanding > credit limit AND oldest unpaid invoice is older than allowed days; OR (b) customer has 30+ day overdue invoices (custom_overdue_block flag set).

2.4 Creating a Delivery Note

- 1 Open the submitted Sales Order.
- 2 Click **Make → Delivery Note**.
- 3 The DN inherits warehouse from location, transporter details, and all item dimensions.
- 4 Set **LR Number** (`custom_lr_number`) and **Transporter**.
- 5 Before submit, the system checks actual stock. If any item is short, a **draft Stock Reconciliation** is automatically created — submit it first, then re-submit the DN.
- 6 On submit: E-Way Bill is auto-generated (if GST API is enabled), sales person gets a bell notification, and the stock update is broadcast to Live Stock Dashboard.

2.5 Creating a Sales Invoice

- 1 Open the submitted Delivery Note.
- 2 Click **Make → Sales Invoice**.
- 3 The SI inherits the same DN number (e.g., DN IB-BWD-DC-00005 → SI IB-BWD-INV-00005).
- 4 Optional: Enter **Transport Charges** (`custom_transport_charges`) — the system automatically adds proportional GST on transport to each GST row.
- 5 On submit: E-Invoice (IRN) is auto-generated; Payment Entry can auto-reconcile.

If SI is created standalone (not from DN), it gets its own number from the global counter.

2.6 Custom Fields on Sales Documents

Field	Purpose	Where
custom_sales_person_user	Email of assigned rep — drives permissions	Q, SO, DN, SI
custom_sales_person	Display name of sales person	Q, SO, DN, SI
custom_location	Maharashtra / Gujarat / Chennai — drives naming & GSTIN	Q, SO, DN, SI
custom_cancel_reason	Required before cancellation	SO, DN, SI
custom_reference_po	Customer's PO number	Q, SO
custom_transport_charges	Freight charges (GST calculated automatically)	SI
custom_return_reason	Reason for return on Credit Note	SI (returns)

2.7 Item Row Dimension Fields

Field	Description
color	Product colour
width_mm	Width in millimetres
length_mtr	Length in metres
qty_pkg	Quantity per package
total_pkg	Total number of packages
custom_thickness	Thickness specification
custom_branding	Branding/print details
custom_marking	Carton marking

2.8 Reopening a Cancelled Document

Cancelled Quotations and Sales Orders can be reopened (not available for DN and SI once submitted):

- 1 Open the cancelled document.
- 2 Click **Reopen** button (visible on cancelled docs).
- 3 The system resets docstatus to 0 (Draft) and adds an audit comment.
- 4 For SO reopen: blocked if any submitted DN or SI is still linked.

2.9 Floor Price Enforcement

Each item can have a **Minimum Margin %** (`custom_min_margin_pct`) configured on the Item master. The floor price = `valuation_rate × (1 + min_margin/100)` .

- **Sales User:** Save is blocked if any row is below floor price.
- **Sales Manager / System Manager:** Warning shown but save is allowed.

2.10 Margin % on Quotation Items

Each Quotation Item shows **Margin %** (`custom_margin_pct`), auto-calculated as:

`margin % = (rate - valuation_rate) / rate × 100`

This field is read-only and updates automatically when rate changes.

3. Payments, Advances & Credit Limits

3.1 Recording a Payment Against a Sales Invoice

- 1 Open the submitted Sales Invoice.
- 2 Click **Make** → **Payment Entry**.
- 3 Set **Amount Received**, **Payment Mode** (Bank / Cash), and **Reference No** (cheque/NEFT number).
- 4 Save and Submit.

Payment Entry on submit automatically sends a bell notification to all Accounts User, Accounts Manager, and System Manager roles.

3.2 Auto-Reconciliation of Payments

When a Payment Entry (Receive type) is submitted with **no reference rows**, the system automatically links it to the oldest outstanding Sales Invoices for that customer (FIFO order) until the payment amount is exhausted.

If the payment amount exceeds all outstanding invoices, the excess stays unallocated with an orange warning. Reconcile manually in Accounts → Bank Reconciliation.

3.3 Recording an Advance Payment Against a Sales Order

To record an advance (before invoice is raised):

- 1 Go to **Accounts** → **Payment Entry** → **New**.
- 2 Set **Payment Type** = Receive, **Party Type** = Customer.
- 3 In the **Payment References** table, add a row:
 - 4 **Reference DocType**: Sales Order
 - 5 **Reference Name**: the SO number (e.g., IB-BWD-SO-00012)
 - 6 **Allocated Amount**: the advance amount
- 7 Save and Submit.
- 8 The SO will now show **Advance Received** (`custom_advance_paid`) field updated automatically.

3.4 Attaching Advance Payment Screenshot / Document to Sales Order

To attach proof of advance payment (bank screenshot, WhatsApp screenshot, etc.):

- 1 Open the Sales Order.
- 2 Click the **Attachment** icon (paperclip icon at top-right of the form, or the Attachments section at the bottom).
- 3 Click **Add Attachment** → **Upload File**.
- 4 Select the image or PDF from your computer and upload.
- 5 Alternatively, drag-and-drop the file onto the attachment area.
- 6 The file appears in the Attachments section and is stored in Frappe's file system.

You can also attach files to any other document (Quotation, Invoice, Lead, etc.) using the same method. Attachments are visible to all users who have access to that document.

3.5 PDC (Post-Dated Cheque) Tracking

Use the **IB PDC** doctype to track post-dated cheques from customers:

- 1 Go to **IB PDC** → **New**.
- 2 Fill in: Customer, Cheque No, Cheque Date, Amount, Bank Name, Related Sales Invoice (optional).
- 3 Status: Pending → Presented → Cleared / Bounced.
- 4 The system sends a bell notification to Accounts roles **3 days before the cheque date**.

3.6 Credit Limit Configuration

Set customer-level credit limit in **Customer** → **Credit Limit** tab:

- **Credit Limit**: Maximum outstanding allowed (₹).

- **Bypass Credit Limit Check:** Tick to skip enforcement for this customer.
- **Custom Days:** Number of days an invoice can be overdue before blocking.

SO submit is blocked only when BOTH conditions are true simultaneously: outstanding > credit_limit AND oldest unpaid invoice older than custom_days.

3.7 Overdue Block

When a customer has a Sales Invoice overdue by 30+ days:

- Daily scheduler sets `custom_overdue_block=1` on the Customer.
- New SO submit is **hard-blocked** for Sales Users; Sales Manager gets a warning only.
- Block is **automatically cleared** when all overdue invoices are paid via Payment Entry.

4. Credit Notes, Debit Notes & Returns

4.1 Sales Return / Credit Note

A Credit Note is a Sales Invoice with **is_return = 1**. Use it when goods are returned by the customer.

- 1 Open the original submitted Sales Invoice.
- 2 Click **Make → Return / Credit Note**.
- 3 The system creates a return SI with negative quantities.
- 4 Fill in **Return Reason** (`custom_return_reason`) — this appears in the Credit Note Register report.
- 5 Submit the Credit Note. It auto-adjusts the outstanding on the original invoice.

Credit Notes get their own naming series: IB-{LOC}-CN-##### (separate from INV sequence).

4.2 Delivery Return (Stock Return)

- 1 Open the submitted Delivery Note.
- 2 Click **Make → Return**.
- 3 The return DN brings stock back into the warehouse.
- 4 Create a Credit Note against the original SI separately (or from the return DN).

4.3 Purchase Debit Note

A Debit Note is a Purchase Invoice with **is_return = 1**. Use it when returning goods to a supplier.

- 1 Open the original submitted Purchase Invoice.
- 2 Click **Make → Return / Debit Note**.
- 3 Naming: IB-{LOC}-DN-##### (the DN- prefix in purchase returns).
- 4 Submit to update supplier outstanding.

4.4 Credit Note Register Report

Go to **Reports → IB Credit Note Register** to see all credit notes with return reasons, original invoices, and values. Filter by date range, customer, territory, or sales person.

4.5 General Ledger & Accounting Impact

All submitted Sales Invoices, Credit Notes, and Payment Entries create GL Entries automatically:

- SI submit: Debit Customer AR account, Credit Sales Revenue account + GST accounts.
- Credit Note submit: Reverses the above (Debit Sales Returns, Credit Customer AR).
- Payment Entry: Debit Bank/Cash account, Credit Customer AR account.

View GL entries: **Accounts → General Ledger** report, or open any document → View → Ledger.

5. Lead Management & CRM

5.1 Creating a Lead

- 1 Go to **Workspace** → **Sales & CRM** → **Leads Pipeline** or **CRM** → **Lead** → **New**.
- 2 Fill in: Lead Name, Mobile No, Email, Territory.
- 3 Enter **Pincode** (`custom_pincode`) — the system auto-fills City and District via India Post API.
- 4 Save. The lead is automatically assigned to a sales person via round-robin within the Lead Sales Team for that territory.

5.2 Lead Statuses

Status	Meaning
New	Just created, not yet contacted
Contacted	Initial contact made
Warm	Interested, follow-up scheduled
Hot	High probability, ready to quote
Cold	Went quiet, win-back eligible
Quoted	Quotation sent
Converted	Became a customer
Lost	Deal lost
Junk	Spam / invalid

5.3 Changing Lead Status (Quick)

In the Lead List view, click the coloured status pill next to a lead row to open a floating status picker — change status without opening the full form.

5.4 Logging Activity on a Lead

- 1 Open a Lead.
- 2 Click **Log Activity** button (top of form).
- 3 Select Activity Type: Call / Meeting / WhatsApp / Email / Visit.
- 4 Select Outcome: Positive / Neutral / Negative / No Answer.
- 5 Add Notes and optionally set **Next Follow-Up Date**.
- 6 Click Save. An activity entry appears in the Lead's timeline.

5.5 Lead Scoring

Each lead gets an automatic score (0–100):

- Temperature: Cold=0, Warm=30, Hot=60 points.
- Status bonus: up to 30 additional points.
- Contact completeness: mobile/email/product interest/follow-up date present.

Score is visible as `custom_lead_score` on the Lead form.

5.6 Converting Lead to Customer

- 1 Open the Lead (status should be Quoted or Hot).
- 2 Click **Make** → **Customer**.
- 3 The custom mapper carries: Territory, Pincode, City, District, Sales Person.
- 4 A new Customer record is created linked to this Lead.

5.7 Win-Back Nudges (Automatic)

Daily scheduler triggers alerts:

- Open/Replied Quotations with no activity in 14+ days → alert sent to rep.
- Leads in Cold/Contacted/Warm status with no activity in 30+ days → alert to lead owner.

5.8 Lead Sales Team Configuration

Go to **Lead Sales Team** doctype to configure round-robin assignment:

- Add Members (Users) and their Territories.
- Leads from matching territories are assigned in round-robin order.
- The team leader gets the Sales Manager role automatically on save.

6. Customer Board & Assignments

6.1 Customer Board Overview

Access via **Workspace** → **Sales & CRM** → **Customer Board**. This is a 4-column Kanban showing customers assigned for sales visits:

Column	Meaning
Dormant Pool	Customers with no orders in 90+ days, available to assign
Regular Pool	Active customers available to assign for today/tomorrow
Today	Customers assigned for visit today
Tomorrow	Customers pre-assigned for tomorrow

6.2 Adding a Customer to Your Board

- 1 Open Customer Board.
- 2 Browse the Dormant or Regular pool columns (server-side paginated, 50/page).
- 3 Click the + button on any customer card to add them to Today or Tomorrow.
- 4 A 5-second undo toast appears — click Undo to reverse.

6.3 Sales Target Progress Card

At the top of the Customer Board, a target card shows the current month's sales target and MTD revenue for the logged-in user. Hidden when no target is set.

6.4 Assignment Admin (Manager View)

Access via **Workspace** → **Sales & CRM** → **Assignment Admin** (Sales Manager / System Manager only):

- **Roster Overview:** All sales reps with avatar, stats, MTD progress, and target bar.
- **View As:** View any rep's board and add/remove assignments on their behalf.
- **Pool Assign Panel:** Bulk-assign customers from the territory pool to a user for a date.

6.5 Automatic Daily Assignment

At 12:00 AM daily, the scheduler:

1. Rolls over pending assignments from today to tomorrow.
2. Auto-assigns tomorrow's batch per each user's territory (dormant:regular ratio per IB Assignment Config).

6.6 Marking Assignment Done

When a Sales Order is submitted for a customer, their assignment is automatically marked as **Order Placed** (done).

6.7 IB Assignment Config

Go to **IB Assignment Config** (singleton) to configure:

- **Assignments Per Day:** How many customers each rep sees daily.
- **Dormant Threshold Days:** Days without order to classify as Dormant.
- **Dormant Ratio:** % of daily assignments from the Dormant pool.

6.8 Customer Health Score

Daily scheduler computes a weighted health score for each active customer:

Factor	Weight	Metric
Payment Punctuality	35%	Avg days paid after due date
Order Frequency	30%	Orders in last 90 days
Complaint Count	20%	Credit notes / returns
CSAT Rating	15%	Average rating from feedback

- Green: score ≥ 70 | Amber: score ≥ 40 | Red: score < 40
- If score drops 15+ points in one day, an email alert goes to all Sales Manager / System Manager.

View: **Workspace** → **Sales & CRM** → **Customer Health** page.

7. Stock & Inventory

7.1 Live Stock Dashboard

Access via **Workspace → Stock & Inventory → Live Stock Balance**.

- Shows real-time stock for all items across 3 warehouses.
- **Filter chips:** Item Group, UOM (SQMT=orange / PCS=blue / KG=green), Warehouse, Hide Zero / Show Zero Only.
- **Multi-token search:** Type multiple words (e.g., "red 500 sqmt") — all tokens must match.
- **Color dots:** Visual color swatches from item color field.
- **Breakdown popover:** Click any row for per-warehouse bars, reserved %, spec tags.
- **CSV Export:** Download as spreadsheet.
- **Live updates:** Dashboard refreshes automatically when DN/SO/Stock Entry is submitted (WebSocket).

Click an item's row to open the **Stock Ledger** for that item.

7.2 Stock Ledger

Workspace → Stock & Inventory → Stock Ledger. Filter by item, warehouse, and date range to see all stock movements with voucher references.

7.3 Item Price List

Workspace → Stock & Inventory → IB Rate Card. Shows all items with Rate 1–4 columns (color-coded headers). Click any row to open a popover with full rate details and spec information.

- Managers can click the Edit button (toolbar) to update rates.
- Click an item code to go to the Item master (same tab).

7.4 Batch Tracking

Items in item groups: BOPP, CLOTH, FOAM, SPECIALTY automatically have `has_batch_no = 1` (Batch Tracking enabled). When creating Stock Entries or Delivery Notes, select the batch number.

7.5 Stock Ageing Report

Go to **Reports → IB Stock Ageing**. Shows per-item/warehouse: quantity, first receipt date, age in days, and buckets (0-30, 31-60, 61-90, 90+ days). Old stock (60+ days) is highlighted.

7.6 Reorder Alerts

Daily scheduler checks bins against reorder levels configured on each item. When `actual_qty ≤ reorder_level`, a bell notification is sent to Purchase Manager / Purchase User / System Manager roles. Alerts are deduplicated (one per item per 7 days).

7.7 IB Jumbo Roll Traceability

The **IB Jumbo Roll** doctype tracks raw material rolls from receipt through production:

- Fields: Supplier, Received Date, Batch No, Adhesive Lot, GSM, Width (mm), Length (mtr), Liner Type.
- Status: Pending / In Production / Used / Rejected.

8. Purchase Module

8.1 Purchase Workflow

Purchase Order (PO) → Goods Receipt (GRN) → Purchase Invoice (PI) → Payment Entry

8.2 Creating a Purchase Order

- 1 Go to **Workspace** → **Procurement Dashboard** → **Purchase Order** → **New**.
- 2 Set Location (auto-sets naming prefix and cost center).
- 3 Select Supplier. The GST template auto-switches between In-state, Out-state, and RCM based on GSTINs.
- 4 For ROLL UOM items: enter **SQMT Rate** (`custom_sqmt_rate`). The system auto-calculates Rate per ROLL = $\text{sqmt_rate} \times \text{conversion_factor}$.
- 5 Submit. A cancellation reason is required to cancel.

8.3 PO Follow-Up Alert

If a submitted PO has no linked GRN (Goods Receipt) after 7 days, the Purchase Manager / Purchase User roles get a bell notification.

8.4 Vendor Payment Due Alert

If a Purchase Invoice has payment due within 7 days and outstanding > 0, all Purchase Manager / Purchase User / System Manager roles get a notification.

8.5 GSTR-2B & Purchase Reconciliation

Access via **GST India Workspace** → **Purchase Reconciliation Tool**:

- Download GSTR-2B from GST portal (API or manual JSON upload).
- System auto-matches against submitted Purchase Invoices.
- Unmatched items need manual review.

8.6 IB AP Aging Report

Go to **Reports** → **IB AP Aging**. Shows outstanding Purchase Invoices with age buckets. Filter by supplier.

9. GST, E-Invoice & E-Way Bill (Compliance)

9.1 GST Configuration Status

Setting	Status
E-Invoice Enabled	Yes (from 2026-03-14)
E-Way Bill Enabled	Yes
API Mode	Production (sandbox_mode=0)
GSP	Adaequare Info Private Limited
MH GSTIN (27...)	LIVE — IRN & EWB tested 2026-05-18
GJ GSTIN (24...)	Pending NIC portal registration
TN GSTIN (33...)	Pending NIC portal registration

9.2 E-Invoice (IRN) Auto-Generation

On Sales Invoice submit, IRN is generated automatically if:

- Customer has a GSTIN (B2C invoices are skipped).
- Invoice is not a return (credit notes skipped).
- Invoice is not already IRN-stamped.

On failure: a warning is shown but the SI is not blocked. Check the Error Log for details.

The IB Tax Invoice print format (feature 70) automatically renders the IRN QR code on Page 1 when an IRN exists.

9.3 E-Way Bill Auto-Generation

On Delivery Note submit, an E-Way Bill is auto-generated if GST API is enabled. The system:

- Maps `custom_lr_number` → `lr_no` (Lorry Receipt number).
- Maps IB Transport GSTIN → `gst_transporter_id`.
- Sets Dispatch From address = warehouse address per location mapping.

To generate E-Way Bill manually from DN list: select the DN → Actions → Generate E-Way Bill. An extended dialog lets you choose Transaction Type (Regular, Bill To-Ship To, Bill From-Dispatch From, Combination) and enter address overrides.

9.4 E-Way Bill Transaction Types

Type	Code	Use When
Regular	1	Supplier ships directly to buyer
Bill To-Ship To	2	Billing address ≠ shipping address
Bill From-Dispatch From	3	Dispatch point ≠ billing address
Combination	4	Both Bill To-Ship To AND Bill From-Dispatch From apply

9.5 GSTR-1 Filing

- 1 Go to **GST India** → **GSTR-1 Beta**.
- 2 Select Company + GSTIN + Year + Month.
- 3 Click **Recompute** — system generates B2B, CDNR, HSN summaries from submitted SIs.
- 4 Review the data. Download Excel or JSON.
- 5 Click **Upload to GST Portal** (requires `enable_gstr_1_api=1` in GST Settings).

9.6 GSTR-3B Report

- 1 Go to **GST India** → **GSTR 3B Report** → **New**.
- 2 Select Company + GSTIN + Year + Month → Save.
- 3 The JSON is generated with outward supply details, ITC eligibility, and inter-state supplies.
- 4 Download JSON for manual portal upload or use API upload.

9.7 GST Tax Templates

Template Name	When Applied
Output GST In-state - IB	Same-state sales (CGST + SGST 9% each = 18%)
Output GST Out-state - IB	Inter-state sales (IGST 18%)
Output GST In-state + Transport - IB	In-state with freight tax row
Output GST Out-state + Transport - IB	Out-state with freight tax row
Input GST In-state - IB	Same-state purchases
Input GST Out-state - IB	Inter-state purchases
Input GST RCM In-state - IB	RCM purchases in-state
Input GST RCM Out-state - IB	RCM purchases out-state

9.8 IB Tax Invoice Print Format

The custom print format **IB Tax Invoice** (available on Sales Invoice) generates a 2-page output:

- **Page 1:** Tax Invoice with IRN/QR code block, company details, item table with per-row GST rates, CGST/SGST/IGST rows, bank details, previous balance, and signature.
- **Page 2:** E-Way Bill print with EWB QR code, address details From/To, goods table, vehicle details.

10. Reports & Analytics

10.1 Sales Reports

Report	What It Shows	Key Filters
IB Sales KPIs	Per-rep: Leads, Quotations, Orders, conversion %, revenue, avg deal, lost deals. Bar chart + summary cards.	Date range, Territory, Sales Person, Lead Source
IB Daily Sales Report	Single-day snapshot: new leads, quotations, orders, dispatches, MTD revenue vs target per rep. 8 summary cards.	Date (default today), Territory
IB Lost Deal Analysis	Lost leads and lost quotations with loss reason, source, territory, month, value.	Date range, Source, Loss Reason, Territory, Sales Person
IB Territory Report	Per-territory: leads, quotations, orders, revenue, conversion %. Color-coded conversion %.	Date range
IB SKU Report	Per-item: orders, qty sold, revenue, avg rate, customer count. Top 10 chart.	Date range, Territory, Item Group
IB Gross Margin	Per-item: qty sold, revenue, COGS (valuation rate), gross profit, margin %. Color-coded margin %.	Date range, Territory, Item Group, Sales Person
IB Sales Person Summary	Per-rep: order count, total revenue, avg and max order value.	Date range, Sales Person, Status, Territory
IB Activity Log	All lead activity timeline entries: activity type, outcome, notes, next follow-up.	Date range, Sales Person, Activity Type, Outcome
IB Dispatch Report	Per-DN: customer, location, transporter, LR number, items, qty, value. Bar chart by transporter.	Date, Warehouse, Sales Person
IB Credit Note Register	All credit notes (SI returns) with return reason, original invoice, customer, value.	Date range, Customer, Territory, Sales Person

10.2 Finance Reports

Report	What It Shows	Key Filters
IB AR Aging	Outstanding Sales Invoices in age buckets (0-30, 31-60, 61-90, 90+ days). Color-coded old invoices.	Customer, Territory, Sales Person
IB AP Aging	Outstanding Purchase Invoices in age buckets.	Supplier
IB Collections Report	Per-rep: invoiced, collected, outstanding, collection %. 3-dataset bar chart.	Date range, Territory, Sales Person
IB Cash Flow Statement	GL-entry based cash flow: inflows/outflows by category (collections, vendor payments, salaries, taxes). Running balance.	Bank Account, Date range
IB Bank Reconciliation	Payment Entries for IB bank accounts with clearance status.	Bank Account, Date range, Show Cleared

10.3 HR & Production Reports

Report	What It Shows
IB Payroll Summary	Per-employee payroll breakdown: Basic/HRA/CA/PF/ESIC/PT/Net. Prorated by attendance if month filter set.
IB Production Report	Work order summary by stage and status.
IB Purchase Pipeline	Submitted POs with receipt and invoice linkage status.
IB Stock Ageing	Per-item/warehouse stock age and value by bucket.

10.4 Using Report Charts

All custom reports support a **Chart Type** filter: Bar / Pie / Donut / Line / Percentage. Change this filter and re-run to switch chart style. Pie/Donut legends wrap to multiple lines automatically.

10.5 Standard ERPNext Reports Still Available

- General Ledger, Trial Balance, Balance Sheet, Profit & Loss
- Sales Register, Purchase Register
- Stock Ledger Entry, Stock Balance, Stock Projected Qty
- GSTR-1, GSTR-2B, GSTR-3B (via india_compliance)
- Salary Register, Attendance Sheet, Leave Ledger

11. Dashboards

11.1 Business Pulse (Main Dashboard)

Access: **Workspace → Dashboards → Business Pulse**. Shows:

- 4 KPI cards: Revenue MTD, Outstanding AR, Open Quotations, Low/Zero Stock — all clickable deep-links.
- Revenue Trend chart (6 months).
- Top Customers bar chart.
- Recent Invoices table.
- Quick Actions grid.

11.2 Finance Dashboard

Workspace → Dashboards → Finance Dashboard. KPIs: Outstanding AR, Outstanding AP, Collections MTD, Cash Balance. Outstanding AR/AP tables with top debtors/creditors. Recent SI list.

11.3 HR Dashboard

Workspace → HR & Payroll → HR Dashboard. KPIs: Active Employees, Present Today, Pending Leaves, Payroll MTD. Tabs: Attendance / Leaves / Payroll / Statutory. Approve/reject leaves inline.

11.4 Procurement Dashboard

Workspace → Dashboards → Procurement Dashboard. KPIs: Open POs, Pending GRNs, Pending Pls, Overdue Vendor Payments. Top Suppliers bar chart. Recent POs table.

11.5 Production Dashboard

Workspace → Production → Production Dashboard. KPIs: Active Work Orders, Pending, Completed Today, Machines Active. Stage pipeline cards (clickable to Production Stages page). Priority strip. Wastage card. Active plan table.

11.6 Analytics Hub

Workspace → Dashboards → Analytics Hub. Aggregated analytics combining sales, finance, and production KPIs.

12. HR, Attendance & Payroll

12.1 Attendance Terminal

Access: **Workspace** → **HR & Payroll** → **Attendance Terminal** (manager view) or **/checkin** URL (employee self-service portal).

- Managers can bulk check-in / mark absent for employees.
- Filter by Factory vs Office.
- Late check-in or early check-out triggers a **reason dialog** (reason stored in Employee Checkin).

12.2 Employee Self-Service Check-In

- Employee opens browser and goes to `/checkin`.
- Employee selects their name and clicks Check-In / Check-Out.
- If late (past shift start + 10 min grace), a reason dialog appears.
- Record is saved to Employee Checkin doctype.

12.3 Auto-Absent Marking

Daily scheduler marks yesterday's employees Absent if no Attendance record exists. Excludes:

- Weekends (Saturday/Sunday).
- Holidays in the employee's holiday list.
- Employees with an approved Leave Application for that day.

12.4 Salary Structures

Structure	Applicable To	Key Formulas
IB Payroll	Office/General staff	Basic=base×2/3; HRA=base×20%; CA=remainder; PF=min(B+CA,15000)×12%; ESIC=(B+HRA)×0.75% if base≤21000; PT=₹175/₹200
Astro Payroll	Factory staff	3 tiers based on gross; B/HRA vary by tier; PF=min(B+HRA,15000)×12%; ESIC similar; PT=₹200 flat

12.5 Payroll Processing

- Ensure each employee has a **Salary Structure Assignment** with the correct salary structure and effective date.
- PF opt-in: set `provident_fund_account` on Employee (blank = PF skipped).
- ESIC opt-in: set `health_insurance_no` on Employee (blank = ESIC skipped; also auto-skipped if base > ₹21,000).
- Run Payroll from **HRMS** → **Payroll** → **Process Payroll**. Select month, company.
- Salary slips are generated. The system credits 2 days leave (for IB Payroll) if employee has absences.
- Submit all salary slips, then post the payment journal entry.

12.6 IB Payroll Summary Report

Go to **Reports** → **IB Payroll Summary**. Computes per-employee breakdown using the salary formula. Filter by Month, Employee Category (All/Factory/Office), Salary Structure.

12.7 Employee Exit & Full & Final Settlement

When an employee's `relieving_date` is set:

- Day of relieving: System creates an **Employee Exit Handover** doc listing all pending Q/SO/DN/SI under that rep's name. HR reassigns them.
- Day after relieving: User account is disabled automatically.

IB Full Final Settlement doctype auto-computes:

- Years of Service, Gratuity (≥5 years: $\text{basic}/26 \times 15 \times \text{years}$), Leave Encashment, Total Payable.

12.8 IB Overtime Request

Employees can create **IB Overtime Request** with: date, shift, overtime hours, reason. HR Manager approves/rejects.

12.9 State-wise Holiday Lists

- Holiday List 2026 - Maharashtra
- Holiday List 2026 - Tamil Nadu
- Holiday List 2026 - Gujarat

Assign the appropriate list to each employee via `holiday_list` field on Employee.

13. Production Module

13.1 Production Stages

Coating → Slitting → Rewinding → Cutting → Packing → Ready to Deliver → Delivered

13.2 Creating an Order Sheet

- 1 Open a submitted Sales Order.
- 2 Click **Create Order Sheet** (custom button) — creates an IB Order Sheet linked to this SO.
- 3 The Order Sheet lists all items to produce. Set priority.
- 4 From the Order Sheet, create individual **IB Work Orders** for each stage.

13.3 Work Order Management

- **IB Work Order**: linked to Order Sheet and Sales Order. Fields: Machine, Operator, Stage, Priority, Target Qty, Completed Qty, Wastage Qty.
- Update stage: **Production Stages page** → drag cards between stage columns.
- Mark complete: enter Completed Qty and Wastage Qty.
- n8n integration: work order updates trigger a webhook to n8n for further automation.

13.4 Production Dashboard

Workspace → Production → Production Dashboard. Clickable KPI cards, stage pipeline (click to Production Stages), priority strip, wastage card, active plan table, recent production entries.

13.5 DPR (Daily Production Report)

Workspace → Production → DPR Report. Shows today's production activities by machine and stage.

14. Finance & Banking

14.1 Bank Accounts

Bank Account	Account No	IFSC	GL Account
GUJARAT & MAHARASHTRA - HDFC	50200023672503	HDFC0000627	50200023672503 - HDFC - MH & GJ - IB
CHENNAI - HDFC	50200044619421	—	50200044619421 - HDFC - Chennai - IB

14.2 Bank Statement Import

Access: **Workspace** → **Finance** → **Bank Import**.

- 1 Download your HDFC NetBanking CSV statement.
- 2 Drag-and-drop or upload the CSV file.
- 3 Preview shows parsed rows with deposit/withdrawal summary chips.
- 4 Click **Import**. Duplicate rows (same date+amount+ref) are automatically skipped.
- 5 The system creates **Bank Transaction** records (status: Unreconciled).
- 6 Go to **Accounts** → **Bank Reconciliation Tool** to match Bank Transactions to Payment Entries.
- 7 After matching, Payment Entries get a `clearance_date` and show as Cleared in the IB Bank Reconciliation report.

14.3 IB Bank Reconciliation Report

Go to **Reports** → **IB Bank Reconciliation**. Shows Payment Entries for IB bank accounts with clearance status (Cleared / Uncleared). Summary shows total entries, cleared count, uncleared amount, and entries pending 7+ days.

14.4 IB Cash Flow Statement Report

GL-entry based statement categorizing inflows and outflows:

- Customer Collections, Vendor Payments, Salary & Wages, Operating Expenses, Financing, Tax Payments, Inter-account.
- Running balance column. Inflows green, outflows red.

15. WhatsApp Integration

15.1 Overview

WhatsApp messages are sent via OpenWA (local gateway at <http://localhost:2785>). Each sales rep's WhatsApp session is connected separately.

15.2 Setting Up a WhatsApp Session

- 1 Go to **IB WA Session → New**.
- 2 Set Session ID (unique identifier) and Phone number.
- 3 Click **Generate QR**. A QR code appears.
- 4 Open WhatsApp on the phone → Linked Devices → Link a Device → Scan QR.
- 5 Status changes to Connected.

15.3 Sending WhatsApp Message from a Document

- 1 Open any sales document (SO, SI, DN).
- 2 Click the **WhatsApp** button (appears on forms).
- 3 Select a **Template** (configured in IB WA Template doctype).
- 4 Preview the message (variables auto-filled: customer name, document name, territory, etc.).
- 5 Optionally attach the document as a PDF (Packing List for DN, Tax Invoice for SI).
- 6 Click **Send**.

15.4 WA Templates

Templates are stored in **IB WA Template** doctype. Available variables in messages:

- `{customer}` — Customer name
- `{name}` — Document name
- `{territory}` — Territory
- `{contact}` — Contact person
- `{last_order}` — Date of last order

15.5 Automated WA Dormant Blast

Daily scheduler sends WA re-engagement to customers with no SO in 30+ days via the assigned rep's session. Deduplicated (one per customer per 30 days).

15.6 WA Broadcast (System-Wide)

Access: **Workspace → HR & Payroll → WA Broadcast** (System Manager only).

- 1 Enter Title and Message.
- 2 Optionally attach an image.
- 3 Select Target: All Users or Specific Users.
- 4 Click **Send**. Message is delivered in real-time via WebSocket to all logged-in users (and via IB Broadcast Log for offline users).

16. AI Agents & Automation

16.1 AI Agents Overview

Access the AI Inbox: **Workspace** → **AI Agents** → **AI Inbox**. Six agents run daily and create **IB AI Action** records for human review.

Agent	What It Does	Action on Approval
auto_quote	Qualified leads (score > 30, product interest set) → draft Quotation suggestion	Creates draft Quotation for the lead
demand_forecast	12-week SI velocity → 4-week SKU forecast card	Saves forecast data (informational)
smart_reorder	Items where bin qty ≤ reorder level → draft Material Request	Creates draft Material Request
collections	Overdue invoices → Claude-toned WhatsApp dunning message	Sends WA message via OpenWA
istix_enforcer	Work Orders in-progress 8h+ without completion → escalation	Sends bell notification
buying_dna	Customers last ordered > 1.2× their avg cycle → CRM follow-up suggestion	Creates CRM activity suggestion

16.2 Approving / Rejecting AI Actions

- 1 Open **AI Inbox**.
- 2 Filter by Status (Pending) and Agent if needed.
- 3 Review each action: agent badge, Claude badge (if AI-generated), reference link, draft JSON preview.
- 4 Click **Approve** to execute the action, or **Reject** to dismiss.
- 5 Decision is recorded with who approved and when (audit trail).

16.3 Running Agents Manually

From the AI Inbox page: click **Run All Agents** to trigger all 6 agents immediately without waiting for the daily scheduler.

From the status bar: see Claude enabled/disabled status and count of pending actions.

16.4 n8n Workflow Integration

n8n is accessible at <http://localhost:5678>. Triggered by:

- IB Work Order updates (stage changes)
- IB Order Sheet creation (after SO → Order Sheet)

Create workflows in n8n: Webhook node → process → optional Frappe API callback. Set `n8n_webhook_url` in `site_config.json` to wire up.

17. Custom Masters & DocTypes

17.1 Custom DocTypes Reference

DocType	Purpose	Key Fields
IB Branding	Branding/print specifications master	brand_name, description
IB Transport	Transporter master with GSTIN	transporter_name, custom_transport_gst
Lead Sales Team	Round-robin assignment team	team_name, members (child), territories (child)
IB Assignment Config	Singleton — daily board settings	assignments_per_day, dormant_threshold_days, dormant_ratio
IB Customer Assignment	Daily board assignment records	customer, assigned_to, assigned_date, status, source_pool
IB Sales Target	Monthly revenue targets per rep	sales_user, month, target_amount
IB Customer Score	Daily health scores per customer	customer, score_date, total_score, health_status
IB Item Price List	Item price list master	item_code, rate1, rate2, rate3, rate4, specification
IB Sample Request	Sample dispatch lifecycle tracking	customer, status, sample_type, item, qty, feedback, outcome
IB Overtime Request	Employee overtime requests	employee, date, shift, overtime_hours, status, approved_by
IB Full Final Settlement	Exit settlement computation	employee, years_of_service, gratuity, leave_encashment, total_payable
IB PDC	Post-dated cheque tracker	customer, cheque_no, cheque_date, amount, status
IB Jumbo Roll	RM traceability for rolls	supplier, batch_no, gsm, width_mm, length_mtr, status
IB Customer Item Spec	Customer-specific item specs	customer, item_code, custom_width_mm, custom_thickness
IB Work Order	Production work order per stage	sales_order, item_code, stage, machine, operator, status, target_qty, completed_qty
IB Order Sheet	Production plan linked to SO	sales_order, items, status, priority
IB Machine	Production machine master	machine_type, status, location
IB AI Action	AI agent action queue	agent, action_type, status, title, draft_json, reference_doctype
IB Agent Run Log	AI agent execution audit	agent_code, status, run_at, records_processed, actions_taken
IB Broadcast Log	Broadcast message history	title, message, target, sent_by, sent_at
IB WA Session	WhatsApp session management	session_id, phone, status (Connected/Disconnected/QR Pending)
IB WA Template	WA message templates	template_name, message (with {customer} etc. vars), is_active
IB WA Log	WA message audit trail	customer, phone, template, message, status

17.2 IB Sample Request Lifecycle

Each transition uses a whitelisted method (button on form): `mark_work_order_created`, `mark_sent`, `record_feedback`, `close_request`, `convert_to_order`.

17.3 Rate Contracts (Pricing Rules)

Rate contracts use native ERPNext Pricing Rules (no custom code). To set a rate contract for a customer:

- 1 Go to **Accounts** → **Pricing Rule** → **New**.
- 2 Set: Applicable For = Customer, Apply On = Item Code, Price or Discount = Rate.
- 3 Set `valid_from` and `valid_upto` for the contract period.
- 4 On Quotation/SO, the rate auto-applies when the customer + item combo matches.

Q→SO mapper copies rate from Q row. If contract rate changes after Q submission, SO carries the old rate — correct manually if needed.

18. Automated Schedulers & Alerts

18.1 Daily Scheduler Jobs

Job	What It Does	Recipients
Employee Exit Handover	Creates handover doc on relieving_date	HR Managers
User Disable	Disables user account on relieving_date+1	—
Daily Assignment	Rolls over pending assignments, generates tomorrow's board	Sales Users
Follow-Up Reminders	Overdue lead follow-up dates	Lead Owner
Quotation Expiry	Warns at 15/7/1 days; auto-expires past due	Sales Person
Customer Health Score	Computes daily health score per customer	Managers (if 15pt drop)
Dormant Check	Customers with no SO in 60+ days → ToDo + bell notification	Sales Person
Sales Target Notifications	50%/75% month elapsed if behind; end-of-month if target not met	Sales Person
Fulfillment SLA	SO with no DN after 48h	Sales Person
Win-Back Nudges	Stale quotations (14d) and cold leads (30d)	Sales Person / Lead Owner
Reorder Alert	Items below reorder level (7-day cooldown)	Purchase Manager / Purchase User / System Manager
Batch Expiry Alert	Batches expiring in 30 days (7-day cooldown)	Warehouse Manager / Stock User / Purchase Manager
PO Follow-Up	POs with no GRN after 7 days	Purchase Manager / Purchase User
Auto-Absent Marking	Marks yesterday Absent for employees with no attendance	—
Employee Doc Expiry	Employee documents (Passport, PAN) expiring in 30/7 days	HR Managers
Vendor Payment Alert	PO payment due within 7 days	Purchase Manager / Purchase User / System Manager
Overdue Invoice Alert	7d→rep bell; 15d→rep+managers; 30d→block+bell	Sales Person, Managers
PDC Alert	Cheque due in 3 days	Accounts User / Manager, Sales Manager, System Manager
WA Dormant Blast	WhatsApp re-engagement for 30d inactive customers	Customer (via rep's WA session)
AI Agents (Daily)	All 6 AI agents run once daily	AI Inbox (pending human review)

All scheduler alerts use deduplication markers in the Notification Log subject to avoid repeat notifications. Most have configurable cooldown periods.

19. Broadcast & Notifications

19.1 System Broadcast

System Managers can send announcements to all users or specific users via **Workspace → HR & Payroll → WA Broadcast** (or the `ib-broadcast` page directly):

- Real-time delivery via WebSocket to currently logged-in users.
- Offline users see broadcasts on next login (from IB Broadcast Log, last 48 hours).
- Users can mark individual broadcasts as seen to dismiss them.
- History accessible via **Get Broadcast History** (System Manager only).

19.2 Bell Notifications (In-App)

Bell notifications appear in the Frappe notification bell icon (top navbar). All custom alerts are delivered as Notification Log entries. Types used:

- Overdue invoice alerts, quota target nudges, follow-up reminders.
- Payment received/sent confirmations (Accounts roles).
- Dispatch notifications (DN submitted → sales person alerted).
- Comment notifications (comment added on Q/SO → sales person alerted).

19.3 Comment Notifications

When any user adds a Comment on a Quotation or Sales Order, the document's `custom_sales_person_user` receives a bell notification. Self-comments are excluded.

20. Roles & Permissions

20.1 Key Roles

Role	What They Can See / Do
System Manager	Full access to everything. All reports, all documents, all users.
Sales Manager	All sales documents (Q, SO, DN, SI) across all reps. All reports. Create/edit Sales Targets. Override overdue block (warning, not hard block). Floor price: warning not block.
Sales User	Only own documents (where custom_sales_person_user = me OR owner = me). Floor price: hard block below floor. SO submit: blocked by credit limit and overdue block.
Accounts User / Accounts Manager	Payment Entry, SI, financial reports. Bell notifications on PE submit.
Purchase Manager / Purchase User	PO, GRN, PI, purchase reports. Reorder alerts, expiry alerts, vendor payment alerts.
Warehouse Manager / Stock User	Inventory, stock movements, batch tracking, expiry alerts.
HR Manager / HR User	Employee records, attendance, leave management, payroll, F&F settlement.

20.2 Data Isolation (Sales Documents)

Non-privileged users (Sales User role without Sales Manager or System Manager) see:

- Documents where `custom_sales_person_user = their_email` , OR
- Documents they created (`owner = their_email`) where custom_sales_person_user is not set.

Privileged users (Sales Manager, System Manager) see all documents.

20.3 Customer Visibility for Sales Users

Sales Users see customers that are:

- Permanently assigned to them (`custom_sales_person_user = me`), OR
- Owned by them and unassigned (legacy docs), OR
- Shared with them via IB Customer Share, OR
- In their daily board (IB Customer Assignment, last 90 days) — only for unowned customers, OR
- In their Lead Sales Team territories — only for unowned customers.

21. System Administration

21.1 Common Commands (for Admins / Developers)

When	Command
After Python changes	<code>bench restart</code>
After JS/CSS changes	<code>bench build --app instabiz</code>
After fixture JSON changes	<code>bench --site frontend migrate</code>
After hooks.py changes	<code>bench --site frontend clear-cache</code>
Export fixtures after schema changes	<code>bench --site frontend export-fixtures --app instabiz</code>
Run scheduler job manually	<code>bench --site frontend execute instabiz.overrides.overdue_alert.run_overdue_alert</code>
Bench Python console	<code>bench --site frontend console</code>
View error logs	<code>tail -f logs/worker.error.log</code> or <code>tail -f logs/web.error.log</code>

21.2 Print Formats Available

Print Format	DocType	What It Prints
IB Tax Invoice	Sales Invoice	2-page: Page 1 = Tax Invoice with IRN/QR; Page 2 = E-Way Bill
IB Packing List	Delivery Note	Item-wise: rolls/box, carton weight, carton marking, LR number, signatures
IB Purchase Order	Purchase Order	Formatted PO with supplier details, terms
IB Purchase Invoice	Purchase Invoice	Formatted PI with tax breakup
IB GRN	Purchase Receipt	Goods Receipt Note
IB GST Tax Invoice	Sales Invoice	Alternative GST invoice format
General Ledger	Multiple	GL print for audit/sharing

21.3 Workspace Structure

The **Instabiz Workspace** is the main sidebar app shortcut set. Sections:

- **Dashboards:** Dashboard, Business Pulse, Analytics Hub, Finance Dashboard, Procurement Dashboard, HR Dashboard.
- **Sales & CRM:** Customer Board, Customer Health, Leads Pipeline, Sales Incentives, Quotation, Sales Order, Customer Master, IB Rate Card, Assignment Admin.
- **Stock & Inventory:** Delivery Note, Live Stock Balance, Stock Ledger.
- **Production:** Production Dashboard, Production Stages, DPR Report.
- **HR & Payroll:** Employees, Attendance Terminal, Org Chart, WA Broadcast.
- **Finance:** Bank Import.
- **AI Agents:** AI Inbox, AI Actions (list), Agent Logs (list).

21.4 GST Settings Summary

Setting	Value
enable_api	1 (enabled)
enable_e_invoice	1
auto_generate_e_invoice	1
generate_e_waybill_with_e_invoice	1
e_invoice_applicable_from	2026-03-14
enable_gstr_1_api	1
enable_auto_reconciliation	1
sandbox_mode	0 (Production)

21.5 Running Services

Service	PM2 Name	Port	Start Command
Frappe Bench	—	8000	<code>bench start</code>
OpenWA (WhatsApp)	openwa	2785	<code>pm2 start /home/dev/openwa/ecosystem.config.js</code>

21.6 site_config.json Keys

Key	Purpose
openwa_url	OpenWA gateway URL (http://localhost:2785)
openwa_api_key	OpenWA session API key
anthropic_api_key	Claude API key for AI agents (blank = deterministic fallback)
n8n_webhook_url	n8n Webhook node URL for work order automation

21.7 Employee Drive Sync

When employee documents (PAN, Aadhar, etc.) are attached to an Employee record and the record is saved, files are automatically synced to **Frappe Drive**:

- Creates "HR Documents" team (once) with all HR Manager / System Manager users.
- Creates "Employee Documents" root folder with per-employee subfolders.
- Each attached file is copied to the employee's Drive folder.
- Employee form has a **Open in Drive** button linking to their folder.
- If employee name changes, the Drive folder is automatically renamed.

21.8 Indexes & Performance

Custom database indexes are maintained in `instabiz/overrides/indexes.py` and applied on migrate. Key indexed fields:

- `tabSales Order.custom_sales_person_user`
- `tabIB Customer Assignment.assigned_to, assigned_date`
- Various other frequently-queried fields for the permission filters.

Appendix: Feature Index

Quick reference for all 90 features implemented in instabiz (as of June 2026):

#	Feature	Module	Section
1	Sales Workflow Q→SO→DN→SI with custom mappers, location-aware naming	Sales	2
2	Lead Management — round-robin assignment, territory mapping, pincode autofill	CRM	5
3	Employee Exit Handover — scheduler creates handover docs, disables user	HR	12
4	Attendance / Check-in Portal at /checkin	HR	12
5	New User Onboarding — auto-creates Sales Person, copies UI settings	System	21
6	Custom Masters — IB Branding, IB Transport, Lead Sales Team	Masters	17
7	Role-based Data Isolation — non-privileged users see own docs only	Security	20
8	HRMS Payroll — IB Payroll & Astro Payroll with PF/ESIC/PT	HR	12
9	IB Stock Dashboard — live stock, WebSocket updates, CSV export	Stock	7
10	IB Customer Board — 4-column kanban, daily scheduler, pool assign	CRM	6
11	Instabiz Workspace — 30+ shortcuts in sidebar	UX	21
12	IB Item Price List — custom page with spec rendering, popovers	Stock	7
13	Dormant Customer Detection — 60-day scheduler, ToDo + bell + WA link	CRM	18
14	Sales Target Setting — IB Sales Target doctype, progress bar	Sales	6
15	Customer Health Score — weighted 4-factor score, manager alerts	CRM	6
16	IB Sample Request — status machine with 5 transitions	Sales	17
17	Rate Contracts — native Pricing Rules, auto-apply on Q/SO	Sales	17
18	Lead Scoring — 0–100 score, auto-computed on save	CRM	5
19	Lead → Customer Conversion — custom mapper carrying territory, pincode	CRM	5
20	Lead Status Change Audit — timeline comment on every status change	CRM	5
21	Fulfillment SLA — SO with no DN after 48h → alert rep	Sales	18
22	Win-Back Nudges — stale Q (14d) and cold leads (30d) alerts	CRM	18
23	IB Sales KPIs Report — per-rep conversion metrics + chart	Analytics	10
24	IB Daily Sales Report — single-day snapshot with 8 summary cards	Analytics	10
25	IB Lost Deal Analysis Report — lost leads/quotations by reason	Analytics	10
25b	SO Cancellation Enforcement — custom_cancel_reason required	Sales	2
26	Margin % on Quotation — auto-computed from valuation_rate	Sales	2
27	Floor Price Enforcement — blocks rep, warns manager	Sales	2
28	Item Reorder Alert — daily, 7-day cooldown	Stock	18
29	E-Way Bill Auto-Generate — DN submit, custom dialog with txn types	GST	9
30	PO Follow-Up Alert — PO with no GRN after 7 days	Purchase	18
31	Auto-Absent Marking — daily, skips weekends/holidays/leaves	HR	18
32	IB Overtime Request — employee OT tracking with approval	HR	12
33	IB Full Final Settlement — auto gratuity/leave encashment calc	HR	12
34	Batch Tracking Auto-Set — BOPP/CLOTH/FOAM/SPECIALTY auto has_batch_no	Stock	7
35	Employee Custom Fields — emergency contact, notice period, CTC	HR	12
36	Batch Expiry Alert — 30 days warning, 7-day cooldown	Stock	18
37	Comment Notification on Q/SO — alerts assigned sales person	Sales	19
38	Dispatch Notification — DN submit → bell to sales person with LR details	Sales	19
39	Quotation Expiry — 15/7/1 day alerts, auto-expire	Sales	18
40	Follow-Up Reminders — overdue lead follow-up dates	CRM	18
41	IB Sample Request Transitions — whitelisted state machine	Sales	17
42	Employee Setup Script — one-time Employee record creation from Users	HR	21
43	M6 HR Masters — Departments, Shifts, Leave Types, Salary Structures	HR	12

44	Item Lifecycle (Discontinued) — blocks Q/SO save for discontinued items	Stock	7
45	IB Jumbo Roll — RM traceability doctype	Production	7
46	Packaging Specification on Item — rolls/box, carton weight, marking	Stock	7
47	State-wise Holiday Lists — Maharashtra, Tamil Nadu, Gujarat	HR	12
48	Customer Credit Limit Enforcement — dual condition (amount + days)	Finance	3
49	Employee Drive Sync — auto-upload employee docs to Frappe Drive	HR	21
50	Lead Activity Log — whitelisted log_lead_activity + timeline + button	CRM	5
51	Lead Source Filter on IB Sales KPIs	Analytics	10
52	IB Packing List — Jinja print format on DN	Stock	21
53	IB Stock Ageing Report — age buckets, color-coded	Stock	10
54	IB Dispatch Report — per-DN with transporter bar chart	Analytics	10
55	Vendor Payment Due Alert — PO payment due within 7 days	Purchase	18
56	E-Invoice (IRN) Auto-Generate — SI submit via india_compliance	GST	9
57	Overdue Invoice Alerts — 7d/15d/30d tiers with SO block	Finance	18
58	IB AR Aging Report — outstanding SI by age bucket	Finance	10
59	IB AP Aging Report — outstanding PI by age bucket	Finance	10
60	IB PDC Doctype — post-dated cheque tracker	Finance	3
61	PDC Presentation Alert — 3 days before cheque date	Finance	18
62	IB Territory Report — per-territory leads/orders/revenue	Analytics	10
63	IB SKU Report — per-item revenue, qty, customers	Analytics	10
64	IB Gross Margin Report — revenue vs COGS vs margin %	Analytics	10
65	Attendance Terminal Late/Early Reason — reason dialog for violations only	HR	12
66	Payment Entry Notification — bell to Accounts roles on PE submit	Finance	19
67	Payment Entry Auto-Reconcile — FIFO oldest SI matching	Finance	3
68	Advance Payment Tracking on SO — custom_advance_paid auto-updated	Sales	3
69	IB Collections Report — per-rep invoiced/collected/outstanding	Finance	10
70	IB Tax Invoice Print Format — 2-page IRN+EWB	GST	9
71	IB Credit Note Register — all returns with reasons	Finance	10
72	IB Payroll Summary Report — formula-based payroll breakdown	HR	10
73	IB Sales Person Summary Report — per-rep revenue metrics	Analytics	10
74	Bank Account Master — HDFC MH+GJ and Chennai accounts	Finance	14
75	IB Bank Reconciliation Report — PE clearance status	Finance	14
76	GSTR-1 via india_compliance — B2B/CDNR/HSN generation	GST	9
77	GSTR-3B via india_compliance — monthly 3B report	GST	9
78	GSTR-2B Download & Match — Purchase Reconciliation Tool	GST	8
79	IB Bank Statement Import — HDFC CSV upload + Bank Transaction creation	Finance	14
80	IB Cash Flow Statement — GL-based with categories and running balance	Finance	14
81	Purchase Module Overrides — custom naming, GST auto-select, cancel enforcement	Purchase	8
82	Salary Slip Override — 2-day leave credit for IB Payroll	HR	12
83	WhatsApp Integration — OpenWA, templates, bulk blast	CRM	15
84	Production Module — IB Machine, IB Work Order, IB Order Sheet, 7-stage pipeline	Production	13
85	IB Activity Log Report — lead timeline entries	Analytics	10
86	IB Purchase Pipeline Report — PO with receipt/invoice linkage	Purchase	10
87	Broadcast — System Manager bulk announcements, real-time + history	System	19
88	IB Customer Item Spec — customer-specific item specifications with mismatch warning	Sales	17
89	AI Agents + AI Inbox — 6 agents, human-in-the-loop, audit trail	AI	16
90	n8n Workflow Automation — PM2-managed, triggered on Work Order/Order Sheet events	Automation	16
